Luyanda Sopazi

Software developer

I am a target-driven individual with a record of academic success. I am always eager to learn and add value to a quality-focused company (team) as I am a very good team player. I am ambitious, disciplined, and goal-driven, and I am always willing to solve problems. I possess good communication and leadership skills. I am willing to learn new skills and technologies and accept challenges. I am able to explain technology in a simple and concise manner so that people that are not in the tech industry are able to understand.

Experience

2023 - present

CapaCiTi | 97 Darhum Ave, Salt River, Cape Town

Software Developer | intern

- I am responsible for building, creating, and maintaining websites using HTML, CSS, and JavaScript. I Implement the front-end logic that defines the behavior of the visual elements of web applications. I am also responsible for coding, designing, deploying, and debugging development projects, both on the client and server side. I work with developers to design algorithms and flowcharts.

Projects

Mzamomtsha-Primary-School-Website

Mzamomtsha primary school website. The school is enrolling higher grades up to grade 12. So it lacks an online presence, so we were asked to create and develop a website for the school.

Banking_App using Python

The Banking Application is capable of making Deposits and Withdrawals in the program, tracking these transactions, and updating the bank statement.

Financial Calculator using Python

The program allows the user to access two different financial calculators: an investment calculator and a home loan repayment calculator. The user is allowed to choose which calculation they want to do, either Investment or Bond.

TOOLS

- Visual Studio Code
- GitHub
- MySQL
- Bootstrap
